

CONSERVATION HACKATHON

20TH JUNE 2015

10.00AM - 5.30 PM

NATURAL HISTORY MUSEUM,
LONDON

BIODIVERSITY HACK

Biodiversity indicators and models are a powerful way to monitor and understand human impacts on wildlife, but require accurate, up-to-date information to provide meaningful results. In this hackathon, we're looking for new tools and techniques to streamline data mining for the PREDICTS project and the Living Planet Index.

We're looking for conservationists, ecologists, software developers, programmers, & anybody with a passion for technology and nature.

Join us on the **20th June** and help develop some innovative solutions to conservation challenges.

- Prizes for the best project!
- Lunch and Refreshments Provided
- Bring your own laptop / software
